

Geography

At St Philip's we want our children to leave school with an understanding of the world in which they live. We believe that our geography curriculum is fundamental in broadening our pupils' experiences of the world around them, as well as current environmental issues. We want our children to have a strong grounding in human and physical geography, and to have the opportunity to use maps and have hands-on fieldwork experiences. Our ambition is to teach geography in such a way as to excite our children and encourage them to ask questions about the world in which they live.

We want our children to develop a broad understanding of how Hulme and Manchester sit within the country, the continent and the world. Our intention is for pupils to know how the world has developed and changed over time, not just physically but through human interaction. We want our children to think as geographers looking at the world and thinking about the processes of the planet, assembling the concepts they have learned over time as if putting together a jigsaw puzzle.

Through our curriculum we want to create a curiosity and fascination that is lifelong and for our children to enjoy the wonder of our beautiful world.
